ADAPTABILITY INDEX

Jordi Alba 2022-2023

In addition to **ELO**, **REAP** and **Market Value**, our **team of analysts and data scientists** have developed an innovative **adaptability index** to determine which club would best suit the style of play of a given player.

In the case of **Jordi Alba**, based on his metrics for the **2022-2023 season**, these would be the five teams from the "**TOP-5 Leagues**" (excluding LaLiga) plus the **MLS**, in which he would currently fit best, both in terms of the **playing style** of their **coaches** and the **profile of the players** they currently have in their squad.

Similar Players

according to Adaptability Index

According to **BeSoccer Pro's** advanced algorithms, we have selected the players with the **highest percentage of similarity** within each of the **four teams in which Alba would have the highest ADAPTABILITY** in the aforementioned leagues. To find these players we have taken into account: **defensive duels won, successful defensive 1v1, interceptions, recoveries, dispossessed in own half, successive progressive passes, successful crosses, key passes, successful progressive runs and successful dribbles.**

ELO

What is the ELO?
It is the value that determines the level of a player. It is calculated taking into account diverse variables: match difficulty, opponents, competitions, impact in high pressure moments, goals and decisive assists, states of form...

REAP

What is the REAP?
It is a value that compares the performance of the player with others like him/her (players of similar age, position and leagues). We thus find out the profiles that are above average than what is expected of a determined player at a specific age.

Market Value

What is the Market Value?
It is a mechanism that determines the value of a player in financial terms but after combining relative factors to sporting performance, transfer possibilities, good health/absence of injuries and business generation with sponsorship contracts.

Potential

What is the Potential?
It is an estimation of the maximum ELO possible that a player can reach according to his/her particular performance in a precise moment of his/her career, and the years left that the player in question has ahead of him/her.
